### Eden® Climber Rose

*Rosa 'Meiviolin'*

Height: 10 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 5a

Other Names: Pierre de Ronsard Rose

Group/Class: Climbing Rose

#### Description:

An exciting climber that produces lovely blush pink blooms, with cream reverses tinged in butter yellow; and a moderate fragrance; perfect for garden walls and trellises; prune this variety after blooming

#### Ornamental Features

Eden Climber Rose features showy lightly-scented pink flowers with buttery yellow overtones and a creamy white reverse along the branches from mid spring to mid summer. The flowers are excellent for cutting. It has dark green foliage throughout the season. The glossy oval compound leaves do not develop any appreciable fall color. The fruit is not ornamentally significant.

#### Landscape Attributes

Eden Climber Rose is a multi-stemmed deciduous woody vine with a twining and trailing habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This woody vine will require occasional maintenance and upkeep, and should only be pruned after flowering to avoid removing any of the current season's flowers. It is a good choice for attracting bees and butterflies to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Eden Climber Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use

### Planting & Growing

Eden Climber Rose will grow to be about 10 feet tall at maturity, with a spread of 3 feet. As a climbing rose, it can be leggy near the base and may be concealed by underplanting with lower-growing facer plants. It should be planted near a fence, trellis or other landscape structure where it can be trained to grow upwards on it, or allowed to trail off a retaining wall or slope. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This woody vine should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
