#### **Ornamental Features**

Duchesse de Nemours Peony features bold fragrant creamy white flowers with gold centers at the ends of the stems from late spring to early summer. The flowers are excellent for cutting. Its compound leaves remain green in color throughout the season. The fruit is not ornamentally significant.

#### **Landscape Attributes**

Duchesse de Nemours Peony is an herbaceous perennial with a more or less rounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease

Duchesse de Nemours Peony is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

#### **Planting & Growing**

Duchesse de Nemours Peony will grow to be about 30 inches tall at maturity, with a spread of 3 feet. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 30 inches apart. The flower stalks can be weak and so it may require staking in exposed sites or excessively rich soils. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.
